**Team Name-The squad**

Team Members- Ishita Agarwal

Vishali Sharma

To take data from user who wants ticket.

Python is connected to mysql to take data

Data stored in mysql

We will connect python with html and then data will be taken from form.

Another webpage for those who want to cancel ticket will be created which will show if anyone wants ticket of that train by searching from database.

Ticket will be cancelled of that person and given to that person who first filled form (those who want ticket)

Website code-

```html
!DOCTYPE html>
<html lang="en">

<head>
  <!-- Required meta tags -->
